

Configuration Compliance Finding

Finding CSPM-2026-5368 | Azure Key Vault | Control CIS 8.4. This is a cloud-posture / compliance finding raised by continuous configuration monitoring — a control deviation on a cloud resource, distinct from a software-CVE advisory.

FINDING ID	CLOUD PROVIDER
CSPM-2026-5368	Azure
SERVICE	CONTROL
Key Vault	CIS 8.4
BENCHMARK	SEVERITY
CIS Azure 2.1	Medium
REGION	STATUS
eastus	Resolved

DEVIATION

The monitored resource does not meet the referenced benchmark control. The current configuration weakens the resource's security posture and should be brought into compliance. This finding is configuration-level and does not reference a software CVE.

Configuration Compliance Finding

AFFECTED RESOURCE

Attribute	Value
Resource ID	arn:example:key vault:CSPM-2026-5368
Account / subscription	acct-4128
Owner team	Web Platform
First detected	2026-08-02

REMEDIATION GUIDANCE

Apply the benchmark-recommended configuration (enable encryption, restrict public access, or enforce key rotation as applicable), then confirm the control passes on the next posture evaluation. Track any exception as accepted risk with an owner and review date.
