

Cloud Posture Finding

Finding CSPM-2026-5300 | AWS S3 | Control CIS 2.1.1. This is a cloud-posture / compliance finding raised by continuous configuration monitoring — a control deviation on a cloud resource, distinct from a software-CVE advisory.

FINDING ID	CLOUD PROVIDER
CSPM-2026-5300	AWS
SERVICE	CONTROL
S3	CIS 2.1.1
BENCHMARK	SEVERITY
CIS AWS Foundations 3.0	High
REGION	STATUS
us-east-1	Open

DEVIATION

The monitored resource does not meet the referenced benchmark control. The current configuration weakens the resource's security posture and should be brought into compliance. This finding is configuration-level and does not reference a software CVE.

Cloud Posture Finding

AFFECTED RESOURCE

Attribute	Value
Resource ID	arn:example:s3:CSPM-2026-5300
Account / subscription	acct-4100
Owner team	Platform SRE
First detected	2026-07-09

REMEDIATION GUIDANCE

Apply the benchmark-recommended configuration (enable encryption, restrict public access, or enforce key rotation as applicable), then confirm the control passes on the next posture evaluation. Track any exception as accepted risk with an owner and review date.
